

8.3 Release Enhancements (August 2024)

Paragon Connect

Paragon Connect Corrections and Improvements

- Improvement to change the “Half Bath” label in EasyCMA to use the RESO label “Partial Bath”
- Correction for intermittent error when returning to Account after assuming identity

Updated Interface for CollabLink

CollabLink is getting a stunning makeover! All the features you love are still there—now faster, more responsive, and more intuitive than ever.

Sending just one listing? Now clients are instantly directed to the detailed report. Mobile users, get ready to experience a seamless, new UI and workflow that’s designed just for you!"

What is Collablink? The CollabLink is the website where your clients are taken when you email them links to listings from Paragon Professional or Paragon Connect.

The new CollabLink displays the same listing data in an updated format. All existing CollabLinks will automatically be redirected to the new layout, no settings or workflow changes needed.

New Listing Maintenance Spreadsheet View

Introducing the new Spreadsheet View in Paragon Connect's Listing Maintenance module. Designed to elevate your experience, this feature allows you to effortlessly view more listings and comprehensive listing data than ever before. Whether you're on your desktop, tablet, or smartphone, this dynamic view is accessible to all users across all devices.

Easily switch to the Spreadsheet View with a simple click or tap on the toggle in the app bar. Enjoy the convenience of sortable columns and click on any photo to enter edit mode instantly. Plus, streamline your workflow with quick actions at your fingertips, thanks to the intuitive gear icon on each listing. Enhance your productivity with this smart, efficient way to manage your listings.

Update to Agent Roster Card

We've refined the agent and office card to deliver a cleaner, more streamlined experience! Now, only the most relevant details are displayed, with any empty fields automatically hidden. This update not only saves valuable space but also makes the information easier to read, so you can focus on what matters most without unnecessary clutter. It's a smarter, more efficient way to access the details you need.

New Quick Actions View – Listing Maintenance

We're excited to announce an enhanced way to manage your growing list of quick actions in the Listing Maintenance module! As our features expand, we've reimagined the overflow icon on each listing thumbnail to better serve your needs. Now, when you tap the overflow icon, a sleek side sheet slides open, giving you quick, easy access to all your actions with plenty of room for future enhancements. This streamlined approach ensures you can handle your tasks efficiently, with everything you need just a click away.

Printing Performance

We've made significant enhancements under the hood to supercharge the speed and performance of printing your ConnectView report. Our latest tests reveal that printing is now a remarkable 52% faster, delivering results in record time and boosting your efficiency like never before.
