

Paragon MLS Updates

Select All Associated Documents

If the associated document is marked as public, you can easily download all of the public documents with the easy to use checkbox on the upper left-hand corner.

The screenshot shows the 'Associated Docs (12)' section of the Paragon MLS interface. At the top, there are navigation buttons: 'Criteria', 'Map Search', 'Associated Docs (12)', and '+ New Search'. Below these are utility icons: 'Checked', 'All', 'Email', 'Share', 'Save', 'Print', 'Export', 'Customize', 'Correction', and 'Actions'. The main content area displays listing information: 'MLS #98732419', 'Address: 2216 35th', 'Address2: N/A', and 'Listing Price: \$299,900'. A table lists associated documents with columns for 'Document', 'File Type', 'File Size', 'File Date', and 'Public (Eailable)'. A red circle highlights the 'Public (Eailable)' column header and the 'Yes' entries for 'Legal Description' and 'Plans'. Another red circle highlights the 'All' checkbox in the left-hand corner of the document list.

<input checked="" type="checkbox"/>	Document	File Type	File Size	File Date	Public (Eailable)
<input type="checkbox"/>	SPD	.pdf	193 KB	01/07/2020 09:18:00 AM	No

Recurring Open Houses and Tours

We want to make it easier for you! Users can now easily create multiple open house/tour dates by selecting multiple dates. That way you don't need to add each individual tour when maintaining your listing- you can do it all in one go!

The screenshot shows the 'Add New' form for 'OPEN HOUSE - LS#98725681'. It features a calendar widget for selecting dates, with a red arrow pointing from the 'Add New' button to the calendar. Below the calendar is a table of existing open house entries. The table has columns for 'Open House ID', 'Date', 'Time', and 'TimeZone'. The entries show dates from 1/10/2020 to 1/25/2020, all with a time of 1:00 PM - 7:00 PM MST.

Open House ID	Date	Time	TimeZone
3336670	1/10/2020	1:00 PM - 7:00 PM	MST
3336671	1/11/2020	1:00 PM - 7:00 PM	MST
3336673	1/17/2020	1:00 PM - 7:00 PM	MST
3336672	1/18/2020	1:00 PM - 7:00 PM	MST
3336675	1/24/2020	1:00 PM - 7:00 PM	MST
3336674	1/25/2020	1:00 PM - 7:00 PM	MST

Input Maintenance Errors Table Enhancements

When inputting a listing, we made the maintenance input table more user-friendly by adding these features:

- Resizable pane above the form
- New icons indicate condition type
- Persistent highlighting on the form
- Errors and warnings totals
- Added navigation buttons for moving through the errors (F8 still works too)
- Simplified column data by combining condition type and acceptance columns

Moving through and correcting errors when inputting listing made easy. When you click on the item at the **TOP** of the input screen, that particular field will be highlighted on the top for you to correct; you do not need to hunt it down anymore.

The screenshot shows a software interface for listing input. At the top, there is a 'LISTING' header and a toolbar with buttons: Save, Tax Autofill, Reset Fields, Required Only, Open All, Close All, and Accept Warnings. Below the toolbar, a summary bar indicates '58 warnings, 7 errors' and '4 of 8' items are shown. An error table follows, listing specific errors with their counts and types. Below the table, the main form fields are visible, with the field corresponding to the selected error (55) highlighted in green. The form fields include Price, County, Area, Subdivision, Address (with sub-fields for Address Number, Dir, Street Name, Street Type/Post Dir, Unit, Suite, and Unit #), City, State, Zip, and Internet Include.

New Date Picker Control

The Paragon date picker has been upgraded, which will make navigating calendars and selecting dates easier.

Simplified Save Search and Listing Cart

The designs for Save Search and Listing Carts dialog boxes have been upgraded with better controls, straightforward wording, and consistent design. This will help usability by making workflows and instructions similar across Paragon.

One less step in Save Search and Listing Cart – Just tap on the CONTACT tab if you are saving them for a client instead of for yourself

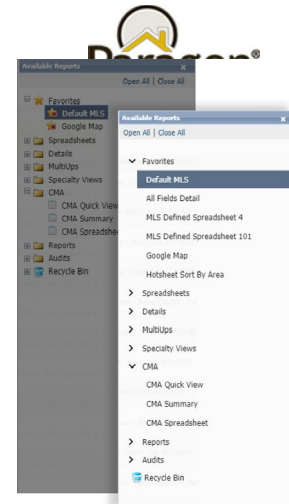

Tree Enhancements

Paragon Enhancements

We've added user-friendly enhancements to the tree menu such as:

- Made it easier to click
- Removed unnecessary UI elements
- Promoted single items to be top-level and no longer requiring a dropdown
- More intuitive method for managing favorites in Views/Reviews

Tooltip for Public Associated Documents

At a glance, you can see what associated documents are considered public. If the document is public, you can easily obtain the information.

Listing Office Check when Converting a Subject Property

When converting a Subject Property to a listing using CMA> Maintain Subject Property, the system will check that the Listing Agents is in the Listing Office for the selected property. If not, an error is returned and the user must select the correct office to clear the error and save. This ensures that if an agent changes offices after creating a Subject Property, the newly saved listing will be assigned to the correct office.

Link to Black Knight (BK) Privacy Policy

A link for the BK (Paragon MLS Vendor) Privacy policy has been added to the Quick Action bar at the bottom of Paragon. This link cannot be removed when customizing the bar.

Default Phone Type for Share Via Text and Adding Contact

When adding a new contact from the Share via Text modal, the phone type will now default to Personal Cellular.
