

## 26.10 Release Enhancements (June 2026)

# Paragon Connect

## Promoting Paragon Connect LIM within Paragon

This release introduces a more seamless way to access Paragon Connect listing workflows directly from within Paragon. The update brings modern listing maintenance closer to the existing Listings experience, making it easier for users to discover and begin using Paragon Connect without disrupting current workflows.

### What is included

Paragon now surfaces Paragon Connect listing workflows within the Listings area. Updated menu paths and a new Explore New prompt highlight where users can access modern listing maintenance.

These in context cues help guide users toward new functionality while preserving the familiarity of existing navigation.

### How it works

Users will see new entry points within the Listings menu that connect directly to Paragon Connect.

- A new area in the Listings menu highlights access to modern listing maintenance
- Key listing workflows can be launched in Paragon Connect from within Paragon
- Paragon Connect opens in a new browser tab so users can continue working without losing their place

### What remains unchanged

All existing Paragon listing tools remain fully available. Users can continue using current workflows while exploring Paragon Connect at their own pace.

### Why this matters

This enhancement begins the transition toward modern listing maintenance by integrating Paragon Connect into everyday workflows. It provides a guided and low friction path for adoption, giving users the flexibility to explore new capabilities while maintaining productivity with familiar tools.

The screenshot displays the Paragon Connect web application interface. At the top, there is a navigation bar with the Paragon logo and a search bar. Below the navigation bar, there is a main menu with various icons for different sections: HOME, SEARCH, LISTINGS, CMA, CONTACTS, FINANCIALS, TAX, ROSTER, RESOURCES, PREFERENCES, ADMIN, and CONNECT. The 'LISTINGS' menu is expanded, showing a sub-menu with the following items: ADD LISTING, MAINTAIN, EXPLORE NEW MAINTENANCE, and GEOCODE QUALITY. The 'EXPLORE NEW MAINTENANCE' section is highlighted with a red arrow, indicating the new entry point for modern listing maintenance. Below the menu, there is a table of listings with columns for ID, Price, Status, Property Type, and more. The table contains two rows of data:

ID	Address	Price	Status	Property Type	Area	Team	Days	Action
200000052	3474 Donnington	\$1,100,000	Active-ACT	Single Family	1000	The ICE Team	20	Select an Action...
200000162	2310 W Teton Place	\$350,000	Active-ACT	Single Family	1000	Trov Rech	23	Select an Action...

## Include Extended Remarks in Spreadsheet

Users can now view and compare more listing details directly in spreadsheet view, making it easier to analyze large datasets without leaving the experience.

### Expanded remarks visibility

Additional remarks fields are now available to add to spreadsheet view. These can be easily selected and saved through the Customize panel, giving users more flexibility to tailor their workspace and quickly compare key details across listings.

### Cleaner, easier to scan layout

Columns now show a shortened preview of longer text, helping keep the grid clean and readable. Instead of stretching across the screen, longer values are trimmed with an ellipsis, making it easier to scan many listings at once. Full details remain available in listing view or through export.

### Complete data in exports

Exports now include the full text for all fields, ensuring users have access to complete information when working in CSV format.

### Why these matters

Users can review and compare listings more efficiently without leaving spreadsheet view, reducing back and forth navigation. With export functionality now available directly in Paragon Connect, there is no longer a need to return to Paragon to complete this step. The ability to export full, untruncated data ensures nothing is lost when moving into external tools, making it easier to perform deeper analysis, share insights, and support downstream workflows with complete and reliable information.

The screenshot shows a spreadsheet interface with a dark header bar. On the left, it says '328 Results Residential (My Default)'. On the right, there are icons for list view, filter, export, folder, settings, and a menu. The table below has columns for Photo, Address, MLS #, Status, Directions, Price, and Type. A red arrow points to the 'Directions' column header.

Photo	Address	MLS #	Status	Directions ↓	Price	Type
	365 N Tullshire Ave	200000217	Active	W on State St from Eagle Rd, N on Linder, W on Escalante	\$744,000	Single f
	612 N Pincushion Ave	200000214	Active	N Linder, W Saguaro, N Senora, W Cardon, N Bursera, W Saguaro, N Nolina, W Golden Barrel- Pincushion	\$750,000	Single f
	3473 S Donnington PL	200000280	Active	N Eagle RD, W Chinden, N Meridian RD, E Chartwell, S on Donnington	\$990,000	Single f
	1078 W Colchester Dr	200000211	Active	Eagle Rd, W Colchester Drive	\$970,500	Single f
	163 W Floating Feather Road	200000213	Active	Eagle & Floating Feather: W on Floating Feather, Subdivision is on the left (South).	\$675,000	Single f

# Enhanced Agent Listing Preview Email with Result Spotlight

Paragon Connect agents can now get a richer, more visual snapshot of listing activity directly from the Agent Listing Preview email.

## What is new

A new **Result Preview** section has been added to the email, giving agents an at a glance view of listings tied to each saved search without needing to leave their inbox.

## Key highlights

- **Instant listing visibility**  
View up to four listings per saved search, complete with photos and key details
- **Clear and organized layout**  
Each saved search includes its own Result Preview section with:
  - Search name for quick context
  - Clean visual separation between listings
  - Easy to scan vertical layout
- **Actionable listing details**  
Each preview includes:
  - Listing photo with direct access to full details
  - Address, city, state, and zip
  - Display ID, status, and price
  - Color coded badges highlighting changes such as New Match, Price Change, Open House, and more
- **Seamless navigation**  
Jump from the email directly into listing details, then easily return to Buyer Activity
- **Encourages deeper engagement**  
A clear call to action makes it easy to access the full set of updates online

## What stays the same

All existing email elements remain unchanged, including the header, contact details, listing counts, and footer, ensuring a familiar and consistent experience.

## Listing Inventory Dashboard Enhancements for New Users

The Listing Inventory dashboard now provides a more insightful starting point with additional default widgets, helping agents quickly understand listing performance and priorities from day one.

What is new

New users will now see the following widgets automatically added to their Listing Inventory dashboard:

- Sell Side widget limited to one instance
- Days on Market
- Unpublished Purge Alert

These additions offer better visibility into listing status, performance timelines, and items that may require immediate attention.

What remains the same

The following widgets continue to be included by default:

- Latest Listing Edits
- Expiring Tracker
- Upcoming Tours
- Upcoming Open Houses

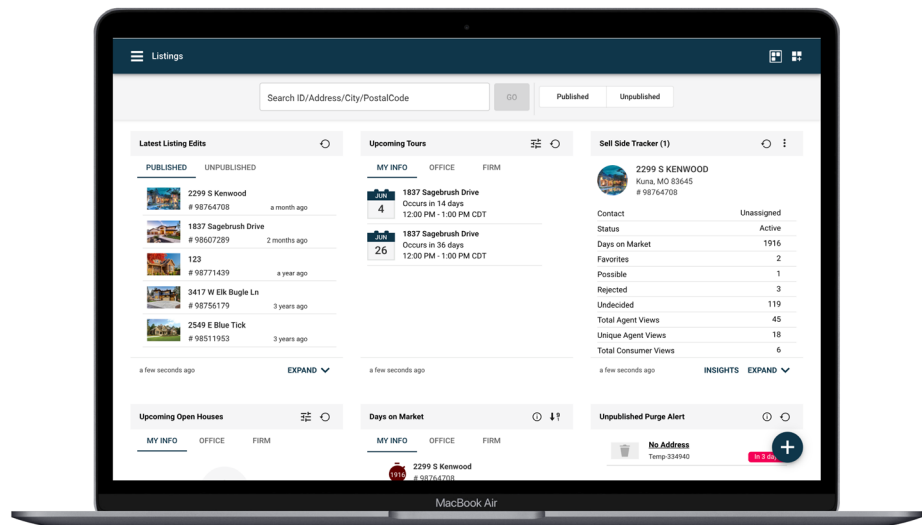

All existing functionality and behavior across the dashboard remain unchanged.

More control for agents

Agents can customize their workspace by removing any widgets they do not need, ensuring the dashboard stays focused and relevant to their workflow.

Availability

This experience applies to new users only. Existing users will not see changes to their current dashboard setup.

# Collaboration Center

## Print Listing Details Directly

Consumers can now quickly create a polished PDF of any listing without leaving Collaboration Center. The new Print option provides a simple and intuitive way to generate professional listing documents in just a few clicks.

### What is new

A print option is now available in the listing detail view within Collaboration Center. This gives agents a fast way to produce a clean, shareable PDF of listing information for clients, presentations, or personal records.

### How it works

Open any listing in Collaboration Center and access the top app bar overflow menu. Select Print to instantly generate a PDF. The output follows the established print experience, ensuring consistency and reliability across tools.

### Key benefits

- Faster access to printable listing details directly within Collaboration Center
- Consistent and familiar PDF layout
- Simple workflow that reduces steps and saves time
- Professional output ready to share with clients or colleagues

This update brings greater efficiency to everyday consumer tasks while maintaining the high quality and consistency expected across the platform.
